Job Description

The ideal candidate will be responsible for developing and supporting tools used by operations, finance and support staff and must be comfortable in a dynamic and fast-paced environment. This position is accountable for implementing cost effective, timely technical solutions that address business needs

Responsibilities *(including but not limited to)*

- Implement technical solutions to address highly complex, strategic business needs:
- Collaborate with internal and external partners to analyze needs and develop clear, specific requirements
- Work effective with team members and project manager to ensure that the project plan is comprehensive and all critical items are included.
- Set clear expectations of resources required based on user requirements.
- Identify additions to scope that will require adjustment to IT resources or timeline
- Design and implement solutions that meet user requirements
- Responsible for Quality Assurance / Testing of business and technical applications
- Implement solutions within agreed upon scope and timeline
- Maintain awareness/develop competency in new technologies as they evolve
- Point of contact and responsibility for effective client interactions that meet or exceed internal service quality targets
- Demonstrate excellent interpersonal, conflict resolution, negotiation, and communication skills

Desired Skills & Experience

Desired Candidate Attributes

- Strong analysis, design, and programming skills
- Demonstrated highly effective communications, interpersonal, and team building skills
- Proven leadership and project management skills
- Proven ability to independently manage the most complex activities

Technical Knowledge, Experience, and Educational Requirements

- Demonstrated expertise in C#, .Net, VB and SQL
- Demonstrated background in Web and Client Server solutions
- Proven ability to integrate packaged software
- B.S. in Computer Science or equivalent experience
- Minimum 5 years' experience
